Go to librarysearch.chemeketa.edu

On the library search page there are two easy ways to search course reserves:

Click on the Course Reserves Search link

OR

Pull down the menu that says Library Resources and change it to Course Reserves.

You can search by course number or by title.

Searching by course number:

Type in the course number with no spaces, e.g., MTH111, and Enter.

A list of items will appear. College Lending items have numbers with the prefix “CL.”

In some cases, there may be multiple sections of a course using different texts, so you may want to check the textbook search at bookstore.chemeketa.edu to be sure of the title, author, and edition.
There can be multiple locations; the “CL” location may not show on the results page. Click the title or “Available at” to see all the locations:

Click on the CL number to see the copies available.

In the illustration, only the first ten copies are shown; to see the rest click the Next button.

Searching by key words:

Try to search by distinctive words that will combine to find your item, for example:

- mathematics Silbey
- NOT
- Introduction algebra
